DAYLIGHT EI 250. Medium speed color negative film with wide exposure latitude, intended for use without filters in daylight, HMI lighting, or mixtures of natural and artificial light. (This stock is being phased out for 7246)

**Price: \$117.80/400' core**

### KODAK VISION 250D/7246

DAYLIGHT EI 250. Medium to high speed color negative film with wide exposure latitude.

**Price: \$126.64/400' core**

## FILM STOCK (cont'd)

### Color Reversal:

EASTMAN EKTACHROME 7240 (Tungsten)

TUNGSTEN EI 125. Low to medium speed color reversal film with little latitude.

**Price: \$25.87/100' spool**

EASTMAN EKTACHROME 7250 (Tungsten)

TUNGSTEN EI 400. High speed color reversal film with little latitude. Designed for one stop pushing where needed.

**Price: \$25.87/100' spool**

EASTMAN EKTACHROME 7239 (Daylight)

DAYLIGHT EI 160. Medium speed color reversal film with little latitude.

**Price: \$25.87/100' spool**

EASTMAN EKTACHROME 7251 (Daylight)

DAYLIGHT EI 400. High speed color reversal film with little latitude.

**Price: \$25.87/100' spool**

### Black & White Negative:

EASTMAN PLUS-X 7231 Negative Film

DAYLIGHT EI 80. Low speed panchromatic negative film suitable for general motion picture photography.

**Price: \$63.64/400' spool**

EASTMAN DOUBLE-X 7222 Negative Film

DAYLIGHT EI 250. High speed panchromatic negative film for use under adverse lighting conditions or where greater depth of field is required without increasing the illumination. Medium grain with strong contrast.

**Price: \$63.64/400' core**

### Black & White Reversal:

EASTMAN PLUS-X 7276 Reversal Film

DAYLIGHT EI 50. Low speed panchromatic reversal films suitable for general motion picture photography. Little latitude.

**Price: \$17.55/100' spool**

EASTMAN TRI-X 7278 Reversal Film

DAYLIGHT EI 200. High speed panchromatic reversal film suitable for general motion picture photography. Little latitude.

**Price: \$17.55/100' spool**

# Supply Lists

## SUPPLY REQUIREMENTS:

Hunter **does not** furnish students with the film or supplies necessary to complete the required projects. Part of the cost of taking these classes is the cost of funding your own exercises through every stage. In Production 1 it is less than the cost of books for many economics and art history courses but it is not an insignificant amount of cash. In Production 2 the cost is greater but you can keep it within your means by conceiving a project tailored to your budget. Filmmaking is not cheap! But remember, more money has never guaranteed a better movie. (*Cotton Club*, *Hudson Hawk*, etc). In fact, humble means have often given rise to outstanding innovation (*Meshes of the Afternoon*, *Superstar: The Karen Carpenter Story*, *La Jetee*, etc.)

If you cannot pull together the financial resources for this stuff then think about saving your dough and taking the class another semester. Running out of money will not be accepted as an excuse for unfinished work! Stay within your means.

As a film major, you will need to scrape together a budget for every project you do from now on. If you can master this skill then you'll be very successful and have lots of friends in the business!

Here is a list of what you'll need and where you can get it.  
ALWAYS ASK FOR THE STUDENT DISCOUNT!

**FILM STOCK:** (Detailed film stock information is contained in this course pack.)

To order Kodak film at a 20% student discount, get a "Kodak Educational Allowance" form from Renato Tonelli, fill it out and have him sign it. For Fuji film, the discount is from the vendor.

### PRODUCTION #1

Each exercise will require at least 400' (4 daylight loading spools) of film. You are restricted to a maximum length of 5 minutes for each project.

It is recommended that you shoot black and white reversal for this class since we are learning basic principles. This is the lowest cost film stock to buy and process so you'll have more footage to work with. If you wish, you may shoot color reversal.

- 7276 B&W Plus-X Reversal, EI 50 (100')(with discount)	12.13
- 7278 B&W Tri-X Reversal, EI 200 (100')	12.13
- 7239 Color Reversal, Daylight, EI 160 (100')	18.36
- 7240 Color Reversal, Tungsten, EI 125 (100')	18.36
- 7250 Color Reversal, Tungsten, EI 400 (100')	18.36
- 7251 Color Reversal, Daylight, EI 400 (100')	18.36

### PRODUCTION #2

Projects must be between 1 – 10 minutes and must be photographed with 16mm negative film stock (B&W or Color). The amount of film you'll need depends on the scope of your project. There are many film stocks to choose from (Fuji or Kodak). Check film stock information pages in this course pack for information and prices.

# Supply Lists con't

## **PROCESSING:**

### **PRODUCTION #1**

There is only one lab in town regularly processes reversal film stock.

- A One Film Labs : 333 W. 39th Street (212) 239-9530  
(they are only open from 9am to 5pm). Payment is C.O.D.

- B&W reversal processing (100' @ .09 per foot) 9.00
- Color reversal processing (100; @ .15 per foot) 15.00

### **PRODUCTION #2**

The lab work necessary for this class is considerably more complex (especially if you proceed with your project and take it to a release print). This is the class where you will begin to understand the role of the film lab and start to forge a relationship with one. There are many excellent labs in New York City and nearly all of them offer some sort of student discount. Detailed pricing information from Guffanti and DuArt are in this course pack.

**PRODUCTION SUPPLIES:** ( can be purchased from the vendors listed below)

### **NECESSARY:**

- Spare take-up daylight loading spools (free from many labs) (prod. 1 & 2)
- Spare 2" take-up cores (prod. 2)
- Black camera tape (prod. 1 & 2)
- Camera brush (prod. 1 & 2)
- Gaffer's tape (not duct tape!) (prod. 1 & 2)
- White gaffer's tape (1") for the slate (prod. 2)
- Leather palm grip gloves (prod. 1 & 2)
- 1/4" reel-to-reel audio tape stock (5" reel / 1.5 or 1.0 mils thick) (prod. 2)
- Spare 1/4" audio take-up reel (5" reel) (prod. 2)
- Extra Nagra & mic. batteries (prod. 2)

### **RECOMMENDED:**

- American Cinematographer's Manual
- Kodak Cinematographer's Field Guide
- Swiss Army Knife
- Mini-Maglight Flashlight
- Canned Air
- Chip chart
- Compass
- Circuit tester
- Polaroid Camera
- Variety of diffusion media
- Tough blue gel (full blue)
- Bag of wooden clothes pins
- Your own incident lightmeter (i.e. Sekonic L-398 Studio Deluxe or Spectra Pro)

B&W Photo, 119 W. 17th Street (212) 807-7474

Lens and Repro, 33 W. 17 (212) 675-1900

## EDITING SUPPLIES:

The following are some items you **MUST** have to edit your projects.

### PRODUCTION #1 (each student)

- Editing tape, clear picture (Ciro, non-perf)
- Grease pencil (white or yellow)
- Sharpie
- (4) 3" cores
- (1) 400' plastic reel & can
- SMPTE Leader: one count
- White leader: 20' (double perf)
- Paper tape
- Magstock, new (opt. Projects 2 &3) (slightly more than the length of your finished film)

### PRODUCTION #2

- ALL OF THE ABOVE ITEMS PLUS...
- Editing tape, white sound (Ciro non-perf)
- Magstock (enough for the multiple audio tracks!)
- White Leader: 35' (double perf)
- White Leader: (35') X (the number of audio tracks) (single-perf)
- Sound fill: (clear leader or discarded footage) (Length of film) X (number of sound tracks)
- Black leader: 10'
- (4) 400' plastic reels

Some of these items can be purchased from the equipment room: TH 520 (see below) but you'll get a better deal if you pool your money and buy supplies in bulk from one of the vendors below. Production supplies may also be purchased from these vendors.

### Production & Post-production supply vendors (not an exhaustive list):

- J&R 545 W. 45 Street (212) 247-0972
- Rafik 814 Broadway (212) 475-7884

### Edit supplies available in room TH 520 (subject to availability):

Sharpie	1.00
Grease Pencil	1.00
Splicing tape (clear)	3.00
Splicing tape (white)	4.00
Beeptones	1.00
SMPTE Leader (one count)	3.00
Paper tape	3.00
2" cores (six)	1.00
3" cores (six)	2.50
White Leader (200 ft. sing. or dbl. perf.)	6.50
Sound Fill (400 ft.)	4.00
Mag. Stock (per 200 ft.)	8.00
